

Together We CAN Prevent Slamming!

We know that our customers have concerns about slamming. Therefore, we are offering a service called Preferred Carrier Freeze (PIC Freeze), which is designed to prevent slamming. By ordering a PIC Freeze, Wabash Mutual Telephone Company will not change your local or long distance carrier(s) unless you contact us directly to request a change or to remove the "freeze." To request a PIC Freeze, please complete the attached form and return it to us. FCC regulations require that we have your signed form before freezing your local or long distance carrier.

You may lift the freeze at anytime by calling us or by giving us written authorization to remove the PIC Freeze. If you have any questions regarding the PIC Freeze, feel free to call our business office at 419-942-1111.

Wabash Mutual Telephone Company

PREFERRED CARRIER FREEZE

Billing Name: _____

Address: _____

Telephone Number(s): _____

You have the option of putting a carrier freeze on your local, InterLATA, and IntraLATA long distance providers. This means that your local and/or long distance provider cannot be changed without authorization from you or unless you remove the freeze. The freeze can only be removed by calling us or by sending written authorization.

To initiate a carrier freeze, please check the appropriate box(s), sign and date:

- I want to freeze my local phone service
- I want to freeze my InterLATA toll service (out of area code/LATA)
- I want to freeze my IntraLATA toll service (within area code/LATA)

Person(s) authorized to change the long distance service on this business/residence account are: (please print)

Customer's Signature

Date
